1. Overview

1.1. Purpose

At Period close the so-called actual cost prices are being calculated, taking into account the actual prices during the month. The price variances related to the quantities sold are added to the actual cost and make up the actual cost of goods sold.

Material Ledger Overview is used if:

- You want to perform actual costing for materials,
- You want to value your material stock each posting period.

Actual Costing aims to provide the actual costs for each material at period close. Each material movement is recorded in the Material Ledger together with the preliminary valuation and any variance (from invoice or order settlement). Material settlement is used to integrate this variance into the material price at period close.

Both single -level and multi-level material settlement are available. Multi-level settlement is used to reconstruct the quantity structure based on the material movements for the period, and assign variances for the raw materials to the finished and semi-finished products as follow-up costs.

The actual price for each material can be updated to the material master for the closed period.

Deadline: WD2

Controlling Area: BE00

1.2. Scope

HGSS	OpCo
✓ Run transactions in SAP ✓ Investigate errors ✓ Save print screen or files on share drive ✓ Log ticket to Heiflow ✓ Notify OpCo via e-mail once done	✓ Review outcome once process is finalized

1.3. Superseded documents

N/A

2. Definitions

2.1. Abbreviations:

HGSS – Heineken Global Sheared Services

Fill in the template according to the agreed upon split (currently 50/50) and send it for OpCo approval.

Note: If in the Market Segments app the value is on credit side, then in the template total value should be on debit side for account 32183001. Then the credit side should be posted on accounts 32185001 and 32184001 according to the agreed upon split.

The template can be found here:

\\145.47.178.164\MchGroupData\Shared Data\HGSS\HGSS RtR\Controlling Activities\02 OPERATIONS\2021\12 December\ML

Send the template to SC Controller for approval.

Once it's approved, log a G/L posting request in Heiflow.

Run transaction **KE27** in SAP

The dialog box 'Set Operating Concern' shows the 'Operating concern' field with 'BE00' selected and 'Alken Maes Belgium' as the description. The 'Status' field shows three green circles. The 'Type of Profit. Analysis' section has two radio buttons: 'costing-based' (selected) and 'account-based'. At the bottom right are three icons: a green checkmark, a red X, and a document icon.

Fill in Operating concern – **BE00**
 Select **costing-based**

The 'Periodic Valuation: Initial Screen' has two tabs: 'Selection criteria' and 'Value fields'. Under 'Actual Data', there are checkboxes for 'From Period' and 'Record Type', both of which are checked. Below these are three radio buttons: 'All Valuation Views' (selected), 'Legal Valuation View', and 'Profit Center Valuation View'. The 'Options' section has checkboxes for 'All val. fids modifiable', 'Periodic Valuation', and 'Test run'. The 'Test run' checkbox is checked. To the right of these options is a yellow button labeled 'Other Selections ... On/Off' and a checkbox for 'Background Processing'.

7. Risks of non-performance

If performed incorrectly or not performed, no or misleading information is provided for business partnering and managerial decision making purposes.

MAR-R-2.3 HEINEKEN financial/managerial accounting & reporting rules/policies are not adhered to. Non-compliance may impact the organization financially or damage company reputation.

MAR-R-2.2 Inadequate processing of GL postings and cost distribution resulting in incorrect target setting/mgmt. decisions and misstatement of financial/managerial data.

MAR-R-2.4 Inefficient and ineffective accounting process resulting in process disturbance, increased correction/revaluation activities, incorrect target setting/mgmt. decisions and increased costs.

MAR-R-2.1 Unauthorized access related to GL posting and/or period end closing activities resulting unwarranted disclosure, incorrect target setting/mgmt. decisions and misstatement of financial/managerial data

8. Compliance control

8.1. Operational Process Controls

N/A

8.2. Key Controls included on Internal Control matrix

Control ID	Control Header	Control Objective	Control Activity	Location	Owner (Role)	Executer (Role)	Frequency
BPM-C-07	Check Inventory Valuation		Check whether inventory is correctly valued at actual costs.	HGSS	HGSS FP&A Team Lead	FP&A Senior Analyst	Monthly
